## SUMMARY

Final year Computer Engineering student at IOE, Tribhuvan University with hands-on experience building and deploying full-stack and AI-powered applications. Built and launched Jachao — a healthtech mobile application with 1,000+ Play Store downloads — using React Native, Node.js, MongoDB, Flask, and Google Cloud Platform. Strong foundation in MERN stack development, REST API design, and AI integration. Actively seeking internship opportunities in full-stack or backend development.

## EDUCATION

### Institute of Engineering, Tribhuvan University

*Bachelor in Computer Engineering*

Kathmandu, Nepal

2022 – Present

- Aggregate Percentage (Semesters I–V): 77.46%
- Secured 93rd rank in IOE Entrance Examination

### Radiant Secondary School

*+2 Science*

Kanchanpur, Nepal

2020 – 2022

- Grade XI GPA: 3.89 / 4.0
- Grade XII GPA: 3.78 / 4.0

### Sunrise Public Secondary School

*SEE*

Kanchanpur, Nepal

2020

- GPA: 3.95/4.0

## PROJECTS

### Jachao – AI Powered HealthTech Application | *React Native, Node.js, Flask, MongoDB, Gemini API, GCP* | [GitHub](#)2025

- Built and deployed a full-stack AI-powered healthtech mobile app serving Nepali users with symptom diagnosis, lab report analysis via photo capture, period tracking with cycle predictions, first aid assistance, and mental health support
- Integrated Gemini API for conversational AI health assistance, multi-turn symptom diagnosis, and automated medical report interpretation
- Designed and implemented RESTful backend APIs using Node.js and Flask, handling authentication, AI requests, and data management
- Architected MongoDB database schema for storing medical reports, period cycle data, user history, and AI analysis results
- Deployed full application infrastructure on Google Cloud Platform; achieved 1,000+ downloads on Google Play Store through organic outreach
- Built SEO-optimized marketing landing page using Next.js with server-side rendering

### MERN E-Commerce Platform | *React.js, Node.js, Express.js, MongoDB, JWT* | [GitHub](#)

2024

- Built a production-ready full-stack e-commerce web application with user authentication, product management, shopping cart, and order processing functionality
- Implemented secure JWT-based authentication and authorization with protected routes on both frontend and backend
- Designed RESTful APIs using Express.js with MongoDB for product, user, and order data management
- Deployed application on Render with environment-based configuration for production and development

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, Python, C/C++, HTML/CSS

**Frontend:** React.js, Next.js, React Native, Tailwind CSS

**Backend:** Node.js, Express.js, Flask, REST API Design

**Database:** MongoDB, Mongoose

**AI Integration:** Gemini API, Prompt Engineering

**Developer Tools:** Git, GitHub, Google Cloud Platform, Render, Postman, VS Code

**Concepts:** MERN Stack, Full Stack Development, JWT Authentication, OAuth, DSA, AI Integration
